

Are we coming for a visit?

Want to build a new pool?

Need to upgrade your existing pool?

Looking for energy efficiency?

Not sure about where to start?

Ask about our visitation program that will have a company representative come out to help you and/or your board, evaluate your existing equipment and recommend upgrades to suit your needs. Our products can save energy, reduce water usage, minimize noise and reduce chemical usage. Let us know where you would like to improve your pool's bottom line and we will help you save time or money or both!

Secondary Sanitizer - AOP

Discover water treatment that's inspired by nature & backed by science for results you can see & feel. Clear Comfort's patented Advanced Oxidation Process (AOP) protects your water with hydroxyl radicals, the most powerful oxidative compound used for recreational water care.

5 year warranty

- Superior combine chlorine reduction
- Models treat from 90 GPM to 2,000 GPM
- Installable in Surge Tanks
- Install in almost any mechanical room
- Save up to 50% on chemical use.
- Proven to kill 99.99% of chlorine-resistant Cryptosporidium
- Low Energy Use
- Direct Injection; no by pass loop required
- Certifications: ANSI/NSF 50 | UL 1563 | EPA Section 7 FIFRA Act

Take some of the headache out of adjusting chemicals

We carry a wide variety of chemical controls that will increase your chemical dosing efficiency. Adding chemicals only when needed reduces chemical overfeed which reduces chemical costs which in turn reduces maintenance costs from over feeding.

We carry a large line of controllers from numerous manufactures, but our go to is BECS. We can install these in most situations whether you have gas chlorine, liquid chlorine, salt generation, or erosion (puck) feed.

Tired of waiting on chlorine deliveries? Ask us about Hyprolyser.

Using harmless salts, water and electricity, the Hyprolyser series are a perfect fit for aquatic facilities. Generating a safe and reliable supply of 0.6% sodium hypochlorite on demand.

- No worries of chlorine weakening
- No need for chlorine storage sheds
- Reduced pH correcting
- No more handling awkward barrels
- The combination of powerful generating capability and convenient salt storage capacity.
- Safe Chlorine generation on site
- No more chlorine burnt clothing
- No more chlorine delivery wait times
- Multiple pools can be treated by a single compact system.
- Using salt as the raw material to generate your own supply of sodium hypochlorite offers several advantages.

Weld in Place PVC Membrane Liner

No need to paint every year to hide the cracks. We can put a PVC Membrane in any pool.

PVC pool lining systems make renovation and new construction easy and cost-effective. Restore your pool to like-new and watertight condition at a fraction of the cost of other renovation systems, you can even add patterns and textures to the liner. When used for new construction, PVC pool liners guarantee a long, low-maintenance life. Never paint, caulk, or repair your pool surface again! Our PVC membrane liners come with a 10—15 year warranty.

Some brands we deal with.

- Pentair
- BECS
- SR Smith
- Daldorado
- Hayward
- Olympic
- Hyprolyser
- Bioguard
- AquaCreek
- Taylor
- Paragon
- Pool Pilot
- ETS
- Fluidra
- Zodiac
- CMP
- Maytronics
- Lamotte
- Aquatrek
- Dazzle
- GF Signet
- Inlays
- VM Pump
- Raypak
- Jandy
- Hayward
- Natara
- Stenner
- Polaris
- Jacuzzi
- Clear Comfort
- Praher Plastics
- Ledge Lounger
- Natural Structures
- Hydrother
- Spectrum
- And many more.
